Experience**

**Project
Responsibility**

Stephen E. Wood, ASLA
Construction Contract Administrator

Mr. Wood's background is focused in horticulture, landscape management, and landscape architecture. His education in horticultural and landscape management was further expanded while at Wood's Landscape Group, a landscape contracting company which he owned and managed successfully for over 10 years. Steve's desire to fully integrate his seasoned horticultural and management skills into the LRM's studio culture led him to complete his studies in landscape architecture and acquire his degree 2006. With his combined studies and experience, Steve has endeavored to continually expand LRM's technical knowledge base. He strives to unite the design process with the realities of fabrication and construction execution.

Mr. Wood has served as LRM's Construction Contract Administrator since joining the firm in 1999. Steve's hands-on landscape construction experience combined with his education in landscape architecture adds a valuable and key skill set to LRM and the projects he is involved in. Steve's collaboration with LRM's staff during the design process helps insure the thoroughness of the firm's construction documents while providing important mentorship to junior staff. With Steve's strong background he is also able to address issues of "constructability" which helps insure quality control standards and minimizes problems during the construction phase. Mr. Wood is well versed in construction methods and techniques, construction costs, technical detailing, specification writing, plant material procurement, as well as proper project administration procedures during the construction process. LAX Gateway, The Shoppes at Chino Hills, and Cerritos Sculpture Garden, are examples of major projects recently completed under the direct observation and review of Mr. Wood.

Mr. Wood is responsible for construction document review to verify the completeness and constructability of the design documents. In addition, Steve will prepare the written specifications and assist with the bid, bid evaluation, and award of the landscape contract. Mr. Wood will serve as field representative for the LRM project team, attending all meetings, and preparing all reports and punch-lists during the construction phase of the project.
